MARIJUANA

- In Manitowoc County, 15% of High School students started using Marijuana before the age of 13.
- THC is impairing or mind-altering.
- CBD is not impairing or does not cause a “high”.
- Delta-8 has psychoactive and intoxicating effects similar to other variants of THC. Is dangerous and will show up on a drug test.
- THC can be added to to vapes or can purchase THC specific vape devices. Vaping THC has been linked to lung injury and even death.
- The teen brain is actively developing and continues to develop until around age 25. Marijuana may harm the developing brain. Early use also increases the risk of mental health and addiction problems.
- Symptoms are red/watery eyes and may have dilated pupils. Additional signs of impairment include: altered perception of time/distance, dry mouth, green coating on the tongue, drowsiness, euphoria, body tremors, impaired short-term memory, poor concentration, odor of marijuana, and relaxed inhibitions. Paranoia and hallucinations may be present in high doses.

OPIOIDS

- 8% of high school students in Manitowoc County reported using prescription painkillers without a doctor’s prescription.
- 3% reported using over-the-counter drugs to get high.
- Prescription painkillers, fentanyl, and heroin. Prescription opioids are prescribed by doctors to treat moderate to severe pain but can also have serious risks and side effects.
- An estimated 100,306 drug overdose deaths in the United States during the 12-month period ending in April 2021.
- Symptoms are constricted pupils, and watery eyes. Additional signs are poor reflexes, droopy eyelids, drowsiness, dry mouth, euphoria, itching, nausea, head nodding off, non-medical injection sites and puncture marks, slow and raspy speech, and slow breathing and movements.
- Overdose signs include the above along with cold and clammy skin, a blueish appearance, agonal or slow and shallow breathing, non-responsive behavior, along with paraphernalia nearby.
- If someone is having an overdose; Call 911 immediately, Administer Narcan (if available) try to keep the person awake and breathing, lay the person on there side to prevent choking, and stay with the person until emergency arrives.
